## EXTENSIVE EXPERIENCE IN THE MARKET

Icompplus Electronics was conceived as a proposal back in 2006, but it wasn't until 2016 that enthusiasm, effort, and dedication became key in establishing it as a company.

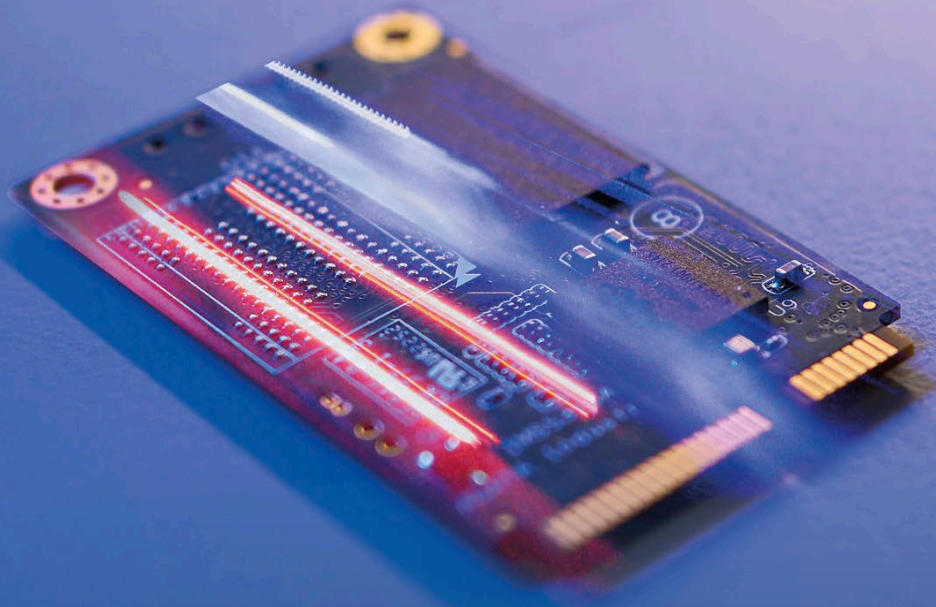

We are a leading distributor specializing in electronic components such as connector technology, passives, energy, semiconductors, electromechanics, passives and energy, with more than **50,000 references** from major manufacturers and clients in over 50 countries.

In an industry of constant growth, we maintain our commitment to quality. For this reason, we are a **certified company** with responsibilities and procedures in place that help us achieve a high level of performance in the delivery of each and every service.

---

We analyze, verify, and guarantee quality under the **ISO 9001** and **EN 9120** certifications

# Specialists in **ELECTRONIC COMPONENTS**

Our extensive experience in electromechanics, semiconductors, and active and passive components is key to having one of the most comprehensive stocks in the market, featuring top industry brands. These are stored in different warehouses and protected with appropriate temperature and humidity controls.

We offer new and original materials under a thorough and specific quality control, which allows us to provide our clients with the best products that have reliable and proper functionality.

Constant demands have enabled us to develop qualities that enhance many aspects of the company's progress and strength.

## THE KEY TO OUR SUCCESS

We ensure the continuity of your project through our storage system, thereby guaranteeing the availability of components.

# Meeting OUR EXPECTATIONS

With facilities that include **three warehouses and a temperature and RH controlled (Relative Humidity) room**, it is crucial to implement specific procedures such as air filtration and flow, positive pressure, access control, appropriate personnel attire, suitable materials and equipment, as well as cleaning and maintenance.

All of this, along with our team, helps us perform established tasks and ensures that the environment maintains the necessary conditions to minimize contamination and protect product quality.

In the business realm, quality optimization translates into policies, procedures, and organizational culture aimed at excellence, utilizing equipment and tools that ensure reliability in production.

- VACUUM PACKAGING MACHINES
- SAFETY TRANSFER OF OBJECTS
- TEMPERATURE AND HUMIDITY CONTROLS
- APPROPRIATE PROTECCIÓN
- MICROSCOPES FOR INSPECTION
- ESD CONTROL METTERS
- DRYING BOOTHS

# COMMITMENT TO **QUALITY**

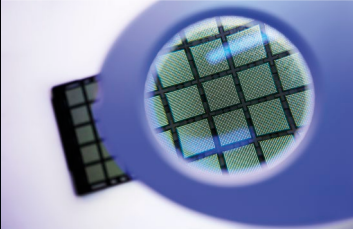

We innovate at a high level, in an environment with talented individuals capable of achieving the impossible.

# **+** INTERNAL PROCESSES

## **RECEIVING AND INCOMING INSPECTION**

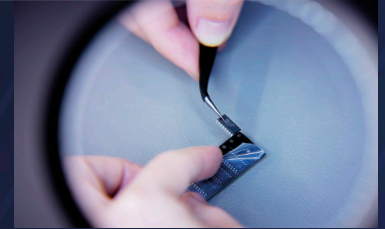

Visual inspection, quantity ordered and part numbers

## **PREVENTIVE MANAGEMENT**

Ensure damage prevention while handling each component

## **PIN AND OXIDATION INSPECTION**

Latest generation microscopes to check the pins

## **COUNTERFEIT DETECTION**

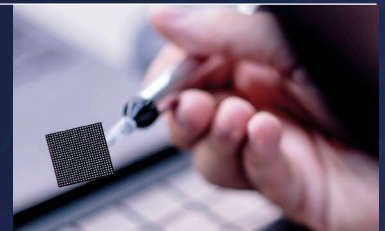

We perform a comparison with our database

## **SOLVENT RESISTANCE**

Use of solvent chemicals to ensure resistance in tests

## **FINAL INSPECTION**

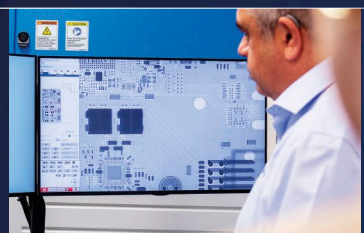

We perform a final check to ensure complete verification

# **+** EXTERNAL PROCESSES

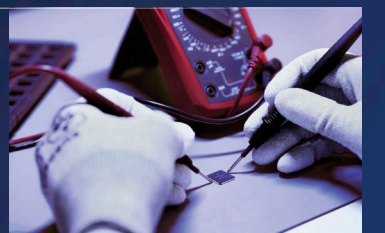

## **SOLDERING TEST**

## **X-RAY TEST**

## **ELECTRICAL TEST**

We partner with external companies to conduct precise tests related to the quality process

# The value of a nearby company

Support for engineering  
from the start of  
the project, **with a  
client-oriented structure**

**We offer alternative solutions**  
that make production feasible,  
including sample shipments and  
**direct manufacturer contact**

Improvement of **prices,**  
**timelines, and quality**  
compared to current conditions

# PARTNERSHIP

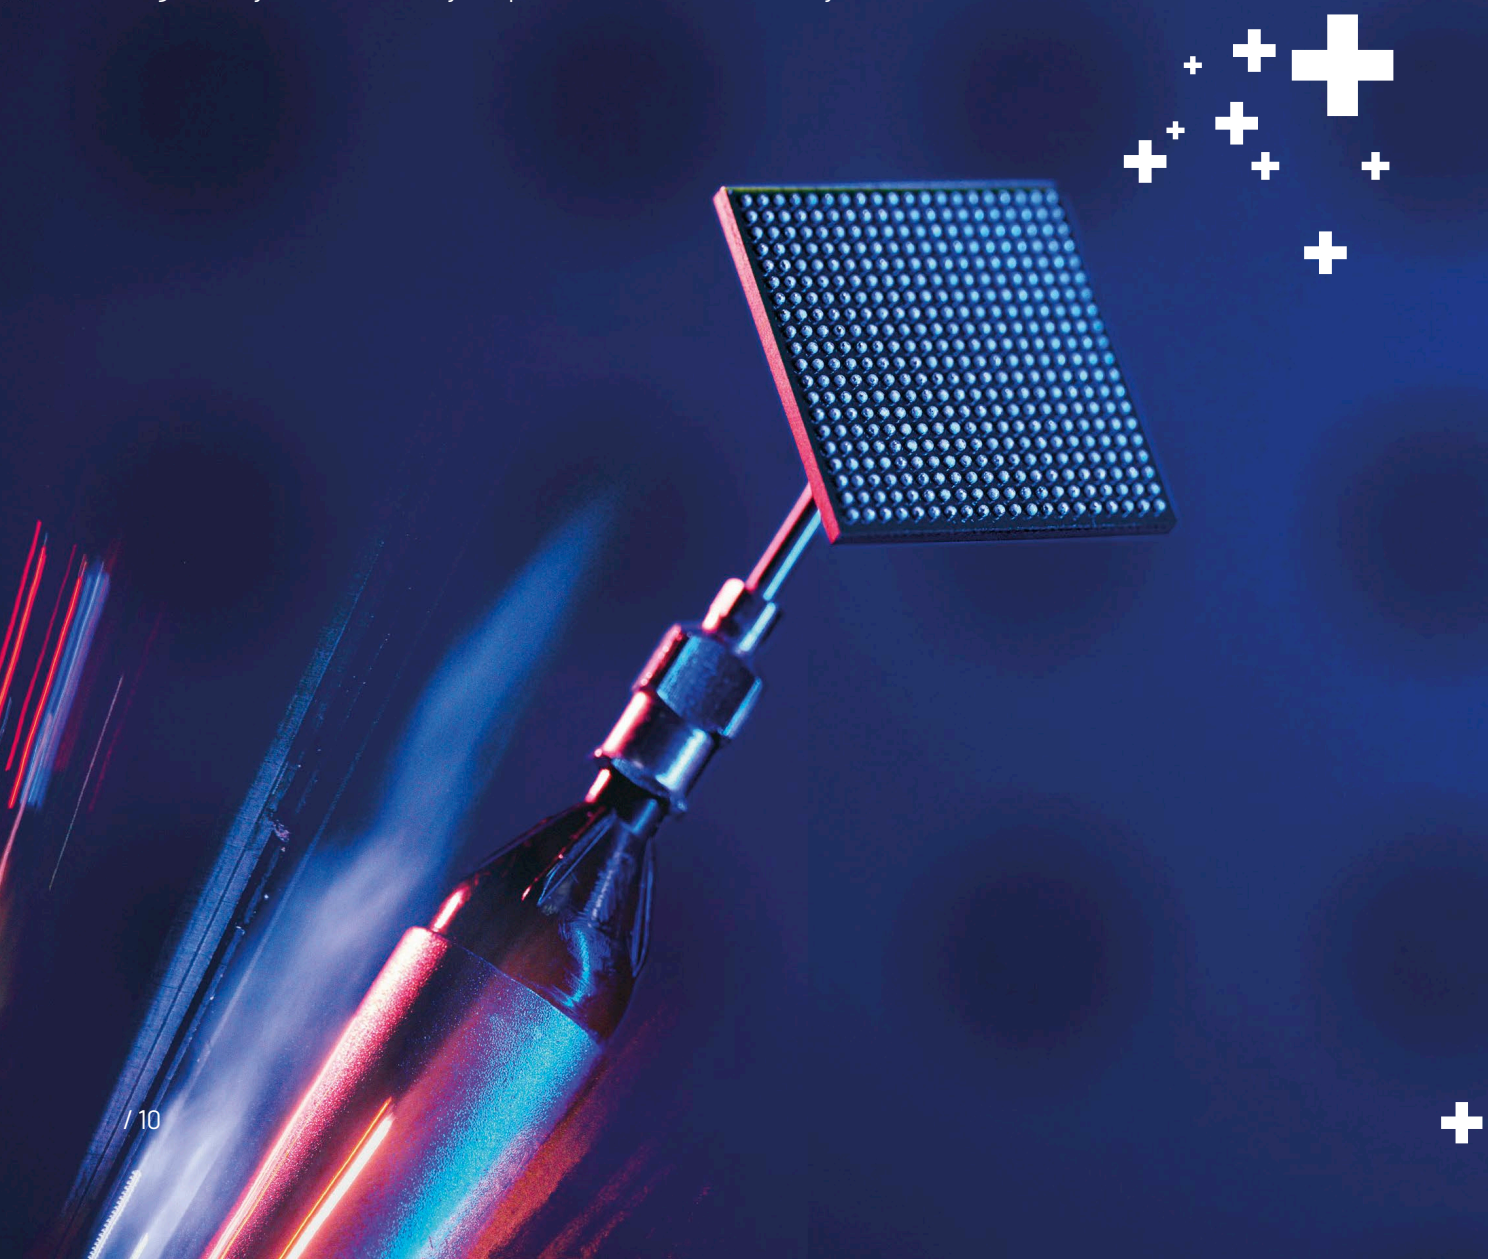

We provide comprehensive support, striving from the inception  
of the idea and with meticulous creation of all the necessary  
elements for its execution and success

Guided by a

# TRANSPARENT & RELIABLE SYSTEM

Qualified personnel and demonstrated visibility throughout the process ensure the necessary satisfaction and requirements. This development is backed by **ISO 9001 and EN 9120 certifications** from the leading company SGS, to enhance client relationships, maintain trust between companies, and foster openness to cutting-edge markets.

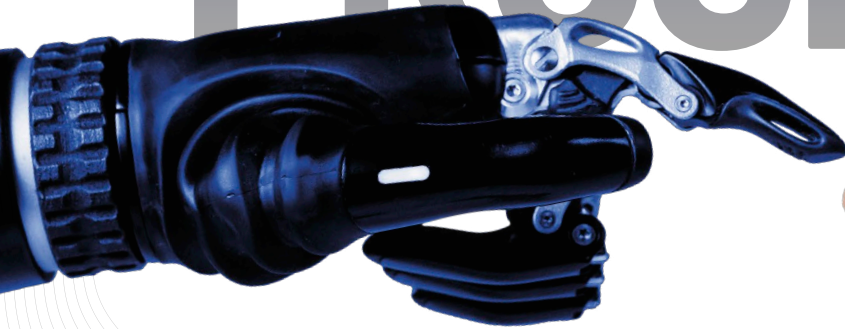

These certifications allow us to perform up to the highest market standards and also with highest service level agreements. This is one of the ways we meet our company's vision to operate efficiently, meet regulatory and statutory requirements, and identify and address risks.

# Reaching new horizons

Implementing a series of processes represents a significant challenge in terms of time, resources, and sustained effort. However, it is also a powerful tool that acknowledges, differentiates, and fosters a culture of continuous improvement within the organization.

# PROGRESS

CERTIFICADORA  
ACREDITADA POR ENAC

## ISO9001

Determines the requirements for a Quality Management System. Helps to continuously monitor and manage processes throughout the company and identify improvement areas.

Sustainability,

# AT THE CORE OF OUR MISSION

In the company's strategic plans, there is a strong commitment to embedding sustainability.

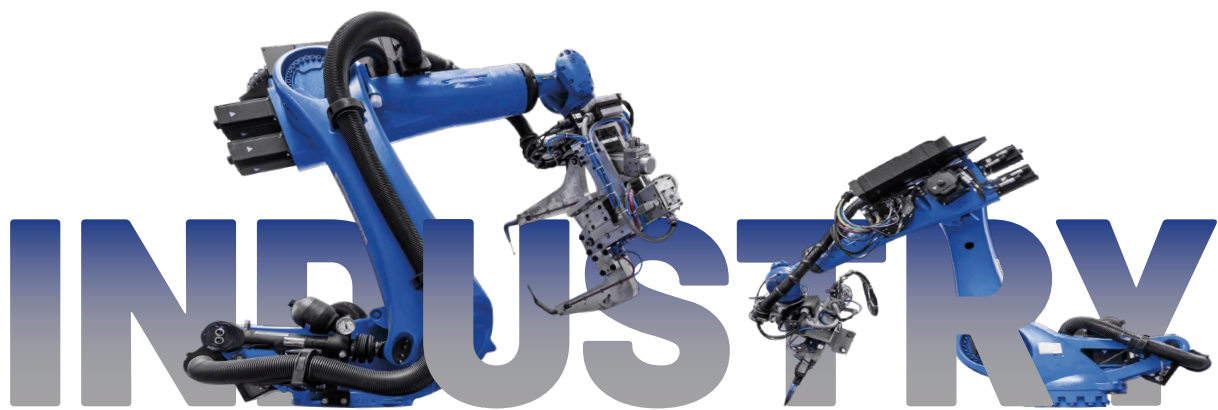

This comprehensive approach not only helps mitigate and adapt to climate change, protect the environment, and enhance societal well-being but also offers long-term competitive benefits.

As such, assessing the carbon footprint is a critical step in shaping emission reduction strategies and balancing economic, social, and environmental needs to ensure sustainable well-being now and in the future.

# Boosting **competitive edge**

The company is actively involved in key technology and digital sector organizations in Spain, which strengthen the country's industry and play a crucial role in global advancement and productivity.
